

Cleveron, Hivebox, Keba win Omniva parcel locker orders

09-10-2017

Cleveron, Keba and Chinese firm Hivebox have been selected to supply parcel lockers to Omniva under five-year contracts worth a total of €20 million. The Estonian postal group said today that it has chosen the three suppliers after an international tender and will invest more than €20 million in the expansion of its Baltic parcel machine network within the next five years. The contracts will be concluded with a term of five years, during which Omniva will acquire new parcel machines for Estonia, Latvia, and Lithuania, thereby significantly expanding the parcel machine network of the company. Currently, Omniva has 276 parcel machines in more than 120 cities across the Baltic region, making it the biggest parcel machine network in the area.
