

Arimo Siren and Juhani Vuola (Posti) win the 2016 IPC Drivers' Challenge in Spa-Francorchamps, Belgium

17-11-2016

Rainy autumn edition of International Post Corporation's Drivers' Challenge hosted by bpost on the Spa-Francorchamps Formula 1 track in Belgium on 17 November 2016.

- Finnish team takes the trophy home for the second consecutive year
- Rainy autumn edition of International Post Corporation's Drivers' Challenge hosted by bpost on the Spa-Francorchamps Formula 1 track in Belgium on 17 November 2016
- Nine teams from various postal operators around Europe overcome challenges of eco-driving and car handling on a hilly trajectory in wet autumn conditions
- Simultaneously organised Belgian national competition doubles number of teams on the track

Pictures of the event are available below.

heavy rain could not stop the highly qualified teams from An Post (Ireland), bpost (Belgium), Correos (Spain), CTT Correios (Portugal), Posti (Finland), Posten Norge (Norway), PostNL Mail, PostNL Parcels (the Netherlands) and PostNord (Sweden-Denmark) to compete in a very challenging fourth edition of the IPC Drivers' Challenge on the legendary Spa-Francorchamps Formula 1 track in Belgium.

The combination of rain, wind and falling leaves made the steep up- and downhill of the track and the narrow surrounding road especially challenging for the 18 teams that competed in the fourth IPC Drivers' Challenge. Teams composed of a professional driver and a manager worked together to succeed in a series of tests related to car handling, eco-driving, safety and customer service. The Finnish team excelled in all aspects of the competition and took this year's IPC Drivers' Challenge trophy home for the second consecutive year. Teams from Belgium and Ireland ranked second and third respectively.

Looking back at the event, Holger Winklbauer, CEO of IPC, said: "This event is a clear demonstration of the postal industry's commitment towards sustainability. Behavioural change is an important element in the strategy to reduce CO₂ emissions. The IPC Drivers' Challenge and in extension also the many national events that are being organised by our participants, achieves this

Brussels, 18 November 2016 – Two days of

goal by promoting a stronger involvement of postal employees.

For the first time, the IPC Drivers' Challenge was combined with the national eco-driving competition of the hosting post. Teams from 10 different bpost mail centres located around Belgium competed to represent their country in the international ranking. The winning team of the national eco-driving competition, Transport Charleroi represented bpost in the IPC Drivers' Challenge 2016 and obtained a well-deserved second place.

well as on enhancing efficiency and saving costs. We are very happy that we could offer the best-in-class drivers the opportunity to compete in this exceptional scenery, a unique experience for many amongst them.”

All aspects of postal services covered

All participating teams consisted of a professional driver and a postal manager. Tests in this fourth edition of the IPC Drivers' Challenge included:

- a theory test
- a series of car checks
- a challenging combination of car handling exercises
- a 40km-long eco-driving route combining the Spa-Francorchamps Formula 1 track experience and the typical narrow uphill roads of the Belgian Ardennes.

All teams performed at a consistent high level, despite the challenging weather and road conditions, showcasing why they were representing their companies.

Tom Goethals, Program Manager Fleet MSO, bpost, who co-organised the event said: “bpost was delighted to host the fourth edition of the IPC Drivers' Challenge. Combining the Belgian national event with the IPC Drivers' Challenge made the event especially interesting and challenging. The extreme autumn conditions with lots of rain and wind and slippery, leaf-covered roads made the 40km-long eco-drive very challenging for the teams. But the competition results clearly demonstrate that even under challenging circumstances we can still work on reducing carbon emissions as

“Team work and commitment lead us to the

victory, and are very proud of to take the trophy home for the second consecutive time. Throughout the different tests, we have been constantly performing at a high level and pushing each other”, said the two winners from Posti, Arimon Siren and Juhani Vuola. “It was a great experience to drive on a real Formula 1 track and our experience of driving in any type of weather conditions definitely helped us to maintain our high level of performance throughout the competition. Competing with our colleagues from Ireland, Belgium, the Netherlands, Norway, Portugal, Spain, Sweden and Denmark was a great experience for us, and we also learned a lot from each other over the two days,” concluded Vuola.

JJ Capron and Pascal Lechat from bpost came in second position, after performing well throughout the entire day, and Damian Fox and Peter Hanley from An Post ended in third position.

Drivers’ Challenge as part of IPC postal sector sustainability programme

The Drivers’ Challenge is part of IPC’s sustainability programme, launched in 2009, bringing together 20 posts from Europe, America, Africa and Asia Pacific. IPC’s Environmental Measurement and Monitoring System (EMMS) provides a common carbon measurement and reporting framework based on internationally recognised standards and open to all posts globally. The IPC programme assesses both carbon management proficiency and absolute carbon emissions reductions and carbon efficiency of participating posts.

About IPC’s Environmental Measurement and Monitoring Programme (EMMS)

IPC’s EMMS programme, the first sector-wide carbon reduction initiative for a services industry was launched in 2009 with a target of reducing postal sector CO₂ emissions by 20% by 2020, based on 2008 baseline figures. The IPC EMMS has 20 participating posts, from Africa, Asia Pacific and Europe, North America and South America. The IPC programme assesses both carbon management proficiency and absolute carbon emissions reductions as well as carbon efficiency of participating posts. In 2014, participating posts collectively reached the 2020 target of a 20% emissions reduction, years ahead of schedule. By 2015, the group achieved a 22.4% reduction in carbon emissions.

About International Post Corporation

International Post Corporation (IPC) is the leading service provider of the global postal industry that provides leadership by driving service quality, interoperability and business-critical intelligence to support posts in defending existing business and expanding into new growth areas. It is a cooperative association of 24 member postal operators in Asia Pacific, Europe and North America. IPC’s solutions and services are used by over 180 posts worldwide. Since 1989 IPC has set standards for upgrading quality and service performance and developed technological solutions that help members enhance service for international letters, packets and parcels. IPC engages in industry research, creates business-critical intelligence, provides a range of platforms and programmes for member post CEOs and senior management to exchange best practices and discuss strategy. IPC also manages the system for incentive-based payments between postal operators.
